

GEARBOXES

We are the specialists for your gearboxes – reliable, competent, flexible and manufacturer-independent.

All of your gearbox requirements from a single source!

We take care of the removal and reinstallation, maintenance, inspection and repair of your gearboxes for you as well as identifying and remedying any weak points.

We carry out damage analyses, determine the causes of damage and opportunities for improvement, and put in place the appropriate measures together with you.

With our "Gear-Protect Program" we are able to offer you a maintenance program that is specially tuned to your requirements.

The spectrum of services offered includes the installation of a MetalSCAN system for early detection of damage, inspection by means of video endoscopy and the provision of special bearings and gear parts, and ranges all the way to guaranteed return delivery times at fixed prices.
